The Wedding Tracker Launches Redesigned Service, Reaches 4,000 Paid
Subscribers

REDMOND, WA - May 25, 2004 /Send2Press Newswire/ -- The Wedding Tracker, LLC has launched a redesigned web site (www.WeddingTracker.com) to improve navigation and enhance customer experience. The Wedding Tracker is the leading provider of wedding web sites based on number of sites hosted and domain names registered.

Wedding web sites are quickly becoming a wedding essential. It is the perfect way for engaged couples to communicate with family and friends as well as showcase plans for the big day. The Wedding Tracker is making it extremely easy and affordable for couples to set up a web site for their wedding.

The redesigned site allows engaged couples to easily build a custom wedding web site using a 12-step wizard. Each web site comes with its own domain name (i.e., www.AmandaandScott.com) that is registered in real-time. Couples can upload over 200 photos to their site, organize them into multiple albums, and turn photo printing on. An online RSVP system allows wedding guests to RSVP online and their responses are recorded directly in the couples planning software.

The web-based planning software that comes with each account is a set of sophisticated tools that allows couples to manage their guest list as well as track invitations, RSVPs, gifts, and more.

The Wedding Tracker, based in Redmond, WA, is the leading provider of wedding web sites, having sold over 4,000 subscriptions in over 70 countries. The service was launched in September 2002 and is offered at US\$70 per year.
