Wedding Tracker, The Leading Wedding Web Site Provider, Launches Photo  
Printing Service

REDMOND, WA - Nov. 13, 2003 /Send2Press Newswire/ -- The Wedding  
Tracker, LLC ([www.theweddingtracker.com](http://www.theweddingtracker.com)) has launched a new photo  
printing service to enhance its personal wedding web site and wedding  
planning software business. The service allows couples to enable full  
photo printing capabilities on their own wedding web site.

The couple and their site visitors can order high quality prints of all  
sizes in addition to a variety of photo gifts like mouse pads, mugs,  
magnets, and ornaments. Photo prints and gifts can be ordered for any  
image uploaded to the site's photo album. Each wedding site has its own  
photo cart and secure ordering capabilities; all without ever leaving  
the couple's wedding web site. According to company co-founder, Sean  
Muller, "The new photo ordering capability is a natural extension of the  
web site service as it helps keep the couple, their family, and wedding  
guests connected both before and after the wedding."

The Wedding Tracker has developed a platform that allows couples to  
build a custom wedding web site using an easy to use web based wizard.  
Each site comes with its own domain name that is registered in real time  
(i.e. [www.AmandaandScott.com](http://www.AmandaandScott.com)). Couples can choose from a variety of  
professional designs and can include over ten feature rich sections.  
The RSVP section, as an example, records RSVP responses directly in the  
web based planning software that comes with each account.

The Wedding Tracker, based in Redmond, WA, is the leading provider of  
wedding web sites, powering over 2,300 live sites for weddings in every  
state and in over 60 countries. The subscription-based service was  
launched in September 2002 and is offered at \$59.95 per year.
