Six Sigma Consultants, Inc. And SigmaFlow Design Integrated Client Solution

Albuquerque, NM - Nov. 18, 2003 /Send2Press Newswire/ -- Six Sigma Consultants, Inc. (SSC) ([www.sixsigmaco.com](http://www.sixsigmaco.com)) announces its new strategic partnership with SigmaFlow, providing clients with an integrated software solution to enhance Six Sigma training, increase productivity and sustain project results.

Traditionally, Six Sigma practitioners have had to use multiple measurement tools to evaluate projects -- a fragmentation that impeded project momentum and sustainability. The SSC/SigmaFlow solution combines training and functionality in a streamlined, user-friendly resource, tying all the tools together. The SSC/SigmaFlow collaboration supports projects throughout the Design, Measure, Analyze, Improve and Control phases (DMAIC). It provides connectivity of the vital few factors in each-increasing training adoption and retention rates while improving cycle times and sustainability. Its connectivity eliminates tedious administrative tasks, reconciles disparate tools, simplifies project review, improves clarity and saves time.

As Greg Brue, SSC president and CEO comments, "This software tool is long overdue and a major productivity enhancement for the Six Sigma community. We conservatively estimate client resource savings of up to 25% per project in the time value of project savings and time to solve the defect problem -- it's an excellent enhancement in the knowledge transfer process for the classroom." Companies can leverage dramatic timesaving and process optimization with this integrated approach-aligning project objectives with one-stop-shop connectivity.

SSC and SigmaFlow's credentials are the foundation of this customer-focused solution. SSC's demonstrated expertise in project implementation and SigmaFlow's innovative solutions capability creates an agile and adaptable tool for lasting Six Sigma gains.

About Six Sigma Consultants, Inc. (SSC)

Six Sigma Consultants, Inc. has implemented Six Sigma programs worldwide for nearly a decade. The company's mission is to assist companies achieve substantial financial results, increase customer satisfaction and sustain those gains through knowledge transfer. President and CEO Greg Brue was one of the first consultants to implement a global Six Sigma deployment at AlliedSignal, now Honeywell International, in 1994 and at General Electric in 1995. Since then, he and his team have implemented numerous Six Sigma programs for diverse world-class organizations. Greg is the author of several publications, including Six Sigma for Managers and Design for Six Sigma with Robert Launsby, both published by McGraw-Hill, and is a regular guest speaker at major business events and quality conferences.

About SigmaFlow

SigmaFlow is the leading provider of Business Process Analysis (BPA) software that encompasses process design and simulation capabilities in

a single, integrated, environment. Founded in 2001, SigmaFlow empowers customers to make strategic decisions that improve their bottom line.

SigmaFlow provides the only intuitive, data-centric, integrated toolkit for company-wide business process design, analysis, management, and simulation. Process-improvement professionals choose SigmaFlow because of its Six Sigma workbench capabilities that save time and improve results. SigmaFlow gives companies unparalleled opportunities to optimize processes, increase productivity, and dramatically improve performance.
