Engineers Week Event. NJ News, Education and Schools, Engineering &
Construction

At&T And Lucent To Host More Than 100 Gifted High School Students And Their
Parents To Attend Science And Technology Event At Princeton University In N.J.

PRINCETON, NJ - Feb. 26, 2004 /Send2Press Newswire/ -- The Hispanic Engineer
National Achievement Awards Corporation (HENAAC), is bringing its nationally
acclaimed Viva Technology program to the Northeast for the first time, with
support from the AT&T and Lucent Foundations.

Tailored for participants in the Young Science Achievers Program (YSAP), the
event will take place at Princeton University Friends Center on Saturday, Feb.
28 from 10 - 4:00 pm. The event coincides with National Engineers Week (Feb.
22-28, 2004), which works to raise awareness and understanding of what
engineers do and how they contribute to our everyday lives and the world.

The Viva Technology program works to motivate the students to pursue careers
in engineering, science and technology.

The YSAP students from New York and New Jersey high schools have been selected
to participate in this prestigious program through a competitive application
process. YSAP works with minority and female high school students to realize
their potential for science and technology by providing them with the
resources and technical support they need to succeed.

The event will feature Princeton University engineering students as well as
guest speakers Jose Mejia, President of Supply Chain Networks at Lucent and
Donna Taliaferro, Vice President - AT&T Consumer Operations Solutions &
Transformation.
