Cerience Announces RepliGo 2.0 for Windows Mobile-based Pocket PCs and Smartphones

New Version Provides Advanced Document Viewing, Annotations and Support for Windows Mobile 2003 Second Edition

FORT COLLINS, CO - March 24, 2004 /Send2Press Newswire/ -- Cerience Corporation today announced the immediate availability of RepliGo(tm) 2.0 for Microsoft Windows Mobile 2003 Second Edition software for Pocket PCs and Smartphones, the next-generation of its award winning content publishing solution. RepliGo translates virtually any desktop document or printable information into precise, highly optimized content for usage on PDAs and Smartphones. Details, screenshots and additional information available at: www.cerience.com.

RepliGo empowers everyday mobile device users to carry vast amounts of diverse information on their Pocket PC or Smartphone. The latest version produces higher quality content, makes it easier to find information and speeds document navigation.

New features include:

- * Windows Mobile 2003 Second Edition support. Brilliant, high resolution display of documents on Pocket PCs and Smartphones with VGA and QVGA screens. The Pocket PC version is compatible with devices that dynamically switch between portrait and landscape orientations.
- * New bookmark, comment and hyperlink features. Automatic conversion of bookmarks, comments and hyperlinks from popular desktop formats like Microsoft(r) Office and Adobe(r) PDF documents. Additionally, users can add personal bookmarks, notes and highlight text.
- * New text capabilities. Unicode support allows for text searching, making it effortless to find information. Copying text to the clipboard is also supported on the Pocket PC and Windows(r) Viewer.
- * Higher quality graphics. New capabilities allow images to retain their full 24-bit quality, providing more clarity and greater detail.
- * New printing capabilities. The Smartphone version now supports full color, infrared printing of documents to compatible HP printers. This feature is already available in the Pocket PC version.
- * Flexible file synchronization. New features allow for direct saving of documents to memory cards or other folders on the device.
- * Enhanced Internet Explorer integration. New conversion preview and automatic scaling features allow translation of Web pages with ease and accuracy.
- * All new Windows Viewer. The new Windows Viewer enables convenient reference and annotation on the desktop while documents remain completely portable to any supported mobile device.
- * Existing features. RepliGo continues to support reflowed text for easy reading on small screens and free RepliGo Viewer software.

RepliGo is priced at \$29.95 for the Pocket PC and \$24.95 for the Smartphone. Existing customers may upgrade for 50% off the full price. The software is available for a fully-functional 14-day trial or purchase at the Cerience

Website (www.cerience.com) and many popular Internet distribution sites.
