Cimaware Software Releases ExcelFIX 4 - a Completely New Version of Its MS
Excel Recovery Software

Madrid, Spain - April 23rd, 2004 /Send2Press Newswire/ -- Cimaware Software (www.cimaware.com), a leading provider of MS Office file recovery software that restores damaged and corrupt files, today introduced major enhancements to its Excel recovery software, releasing ExcelFIX 4. The new version includes changes in both usability and functionality. This release includes a new user interface, design, viewer, and a completely new recovery engine. ExcelFIX 4 works with every version of MS Excel. Among its new features Cimaware Software has included the recovery of charts, pictures, and other embedded objects; External link formulas and 3D link formulas are now restored, and a new advanced editor has been included, as well as an improved Lost String recovery editor.

One of the most important improvements is the new OLE recovery engine. ExcelFIX 4 can reconstruct the damaged OLE structure of an Excel file where no software has been able to before.

ExcelFIX is delivered in 3 commercial editions: Standard, Pro and Enterprise, and one free evaluation Demo version that can be downloaded from the corporate website. Cimaware Software sells all its software as downloads, permitting an immediate delivery of their solutions to the end user. Other solutions by Cimaware Software include AccessFIX, an MS Access recovery solution, and WordFIX that restores Word files that cannot be opened. The Suite OfficeFIX includes all three programs.

"Over a year of work has resulted in this release that places us in a league of our own in the file recovery field, our commitment is to quality and effective and fast customer service," said David Cimadevilla, Cimaware CEO.

Founded in 1985, Spain-based Cimaware Software has oriented its efforts towards the Microsoft Office(R) recovery market since 1998. The organization has been successful in helping companies recover their valuable data in a number of industries. Some of their customers around the globe include Microsoft, Sony Pictures, General Motors, and Continental Airlines. Cimaware Software plans to expand, creating new Software applications in a variety of fields, including back-up utilities and Web Site applications thus diversifying its market share.
