Ace Hardware, Home Depot, now carry composting toilet

[Biolet](#), a Swedish manufacturer, just announced that Ace and Home Depot are now stocking its composting toilet. The eco-friendly system uses no water and needs to be emptied every two months under normal daily usage. According to the maker, the toilet can be self-installed in two hours and does not require access to a septic tank or sewer system.

Home Depot is selling the toilets online from [\\$1,399](#) (for a nonelectric model, shown in this post) to [\\$1,999](#) (electric).
