PartitionMagic Vista Alternative - Free EASEUS Partition Master

NEW YORK, N.Y., March 18, 2009 (SEND2PRESS NEWSWIRE) -- EASEUS, the technological leader in hard disk management software, announced its latest version of EASEUS Partition Manager and renamed it as EASEUS Partition Master. Working as an alternative to PartitionMagic(TM), EASEUS Partition Master Home Edition allows users to resize, move, copy, create and delete partitions for free. Unlike PartitionMagic which fails to support Windows Vista, EASEUS Partition Master is perfectly compatible with Windows 2000/XP/Vista.

Nowadays Windows Vista is becoming more and more popular, and the demand for partition software for Vista is growing dramatically. Although the built-in Disk Management utility in Windows Vista allows users to do some basic operations on hard drive partitions, it has some disadvantages. For example, it only allows users to resize NTFS partitions and is slow in shrinking a partition. Moreover, it also lacks some advanced functions, including moving, hiding a partition and making a partition scheme. So third party applications, like PartitionMagic are needed for better performance. However, since PartitionMagic does not work on Vista, a PartitionMagic Vista alternative is needed.

There are lots of good partition tools available but most of them cost money. Fortunately, EASEUS Partition Master Home Edition, as a PartitionMagic Vista alternative, is designed to meet the needs of computer users to resize partitions in Windows Vista, and is totally free for home users. What's more, this PartitionMagic Vista alternative works perfectly with hardware RAID without any data loss. Users can resize their hard drive with no need to reinstall the System.

For more information about this PartitionMagic Vista alternative, please refer: <http://www.partition-tool.com/personal.htm>

Pricing and Availability

Profession Edition: \$31.96 only. Working as the alternative to PartitionMagic for Vista 64 bit, it supports Vista 64 bit Operating System and allows users to create a bootable CD to manage partitions easier and faster.
