1st Class Real Estate is a nationally recognized top brokerage. They have grown 470% over the past three years, placing them on the Inc 5000 list of the fastest growing private companies in America.

“With all the new tech-enabled competitors coming into the market, like iBuyers, digital brokers, and alternative marketplaces, brokerages need to respond with digital innovation of their own. Consumers today expect to be able to do everything on their phone,” said Sean Daly, [Expetitle](#)’s CEO. “Expetitle’s partnership model gives brokers the tools they need to stay relevant, while also opening up a new income stream from title insurance commissions.”

1st Class Real Estate will first launch fully remote and hybrid closings through a secure platform and mobile app in Florida and Georgia, but eventually plans to roll the service out to all 50 offices nationwide.

“This joint-venture with Expetitle allows us to leverage technology to process our clients’ closings more efficiently and with higher service levels. It eliminates the unknowns in a transaction by providing all parties with real-time information on any device in just a few clicks, giving our agents and their clients the confidence that their closings will happen on schedule,” said Buddy Buchner, VP Franchise Development of 1st Class Real Estate.
