

Implementation Solutions LLC Teams With Citadel Associates as an Accredited Implementation Partner

NEW YORK, NY /Send2Press Newswire/ – Implementation Solutions LLC (www.implementationsolutions.com), a technology consulting firm that services global investment management customers, announced today that it has established a partnership with Citadel Associates, a provider of financial software and consulting services to investment managers, as its Accredited Implementation Partner.

Implementation Solutions' consultants are now certified to work with Citadel's CADIS toolset and will be able to assist Citadel with the deployment and ongoing support of their software solutions. In addition, Implementation Solutions will work closely with Citadel on lead generation and co-marketing activities in North America and Europe.

"We are excited to work with Citadel, assisting in the implementation and support of their mission critical software solutions," said Nicole M. Goudey-Rigger, principal of Implementation Solutions LLC. "Now that our team of consulting professionals is certified on the Citadel software, we can offer an even more robust set of services to our current and prospective clients."

Jean Williams, Managing Director of Citadel, said, "Our Accredited Implementation Partner Program sets very high standards to ensure that our customers receive the highest levels of service and support. I am very impressed by the quality and efficiency of Implementation Solutions' staff who share our commitment to exacting standards. Implementation Solutions consultants will use CADIS to reduce clients' implementation times for Compliance, OMS and Modeling systems and significantly improve the quality of the data being utilized by them."

About Implementation Solutions LLC:

New York based Implementation Solutions brings system and business expertise to both buy- and sell-side firms by providing project management, business analysis and development resources. Implementation Solutions subject matter experts provide years of industry experience as well as certification in numerous industry-standard systems relating to the pre-trade, trade and post-trade process.

The company's services include project management, workflow and process improvement analysis, writing business and functional specifications for systems development, selecting and implementing vendor packages as well as designing and executing user acceptance and quality assurance test scripts. In addition, Implementation Solutions provides design and delivery of custom code to extend or adjunct vendor packages. Current clients include global asset management firms as well as private banking organizations and industry

associations.
