

SoftForYou Releases 'Customer Request' Version of Popular Internet Filtering Software

Dynamic Software Company Continually Makes Their iProtectYou Software Better, Friendlier, and Adds Features

CHAPEL HILL, NC /Send2Press Newswire/ – The SoftForYou Company, a vendor of Internet filtering and child safety software products – today announced the release of iProtectYou Pro Version v7.06, the latest version of its highly-regarded, award-winning Internet Filtering / Parental Control software. This version is fully based on requests expressed by customers.

Send2Press® Newswire

SoftForYou offers parents, schools and libraries a powerful tool to filter out websites filled with violence, hate, pornography and other content inappropriate for children. Businesses get a vital Internet Filtering solution that can dramatically reduce Internet abuse during business hours.

The network version of iProtectYou with remote control module gives administrators an effective solution to manage all installed copies of iProtectYou remotely from one single administrator's computer. The network version comes at no extra cost. This is ideal for home or business. Achieve federally mandated CIPA compliance for small schools and libraries!

Main New Features Include:

- * Daily Time Limits – Now you can control time online as a total – not connected to particular hours in the day. Adjustable to within 10 minutes.*
- * Added new database of obviously trusted web sites*
- * SMTP authentication: Added the ability to send notification emails and daily reports via outgoing servers requiring authentication.*
- * Improvements to User Interface: more user friendly, added a Tool Tips display when the cursor is over any button.*
- * Warning messages appear if an administrator, perhaps without full understanding, makes important setting changes or checks a dangerous box.*

SoftForYou continues the tradition of delivering quality Internet filtering solutions for families and enterprises. The rich set of features makes iProtectYou Pro suitable in many conditions wherever there is a need for control over Internet usage and reliable protection against unregulated data on the Internet. Click [here](#) or go to [Testimonials](#) to see what our satisfied customers have to say.

Pricing and Availability

iProtectYou Pro is compatible with Windows 98, Windows Me, Windows 2000 and Windows XP. The product includes free tech support and free unlimited automated database updates. iProtectYou Pro is available for sale at [SoftForYou.com](#) for US\$34.95. Huge discounts are given for multiple license purchases and repeat customers get lifetimes discounts of up to 70% on later releases. Plus, new releases are free to customers for one year after their purchase. Simply put, iProtectYou is a great deal.

The free 14-day trial version is available via electronic download from www.softforyou.com.

About SoftForYou

SoftForYou is a privately held software company specializing in Internet filtering and child safety software products for both the home and business

markets. Launched in 2000, iProtectYou was specifically developed to help parents to monitor and guard children from the many dangers that exist online and to give a powerful Internet filtering tool to businesses to control Internet use by employees.
