Designer Pro's key features include:

- Single or double-sided, horizontal or vertical, and standard or oversized card options.
- A wide variety of paper stock options available as well as custom configuration for printing ease and convenience.
- Text, shape and logo rotation, as well as partial transparency features.
- A wide range of ready-made business card templates for quick and

professional layout and publication.

– Color blending, textures, and high resolution capacity for outside printing.

Belltech's Business Cards Designer Pro 2.0 is also equipped with advanced design tools for business card creation such as the ability to add beautiful color blends, transparency and texture. This application offers normal cut-copy-paste features, as well as undo/redo functionality for all design elements.

It is also possible to copy and paste text and images from other applications, and designs can be saved as an image file with .bmp, .jpg, .gif, and .png formats. Business Cards Designer Pro can be used to create personal calling cards, store cards, or anything that has a business-card-like size. Business Cards Designer Pro 2.0 comes packed with advanced design tools and professional design templates for every conceivable kind of card.

System Requirements:

– Windows 98/ME/2000/NT/XP/Windows 2003

– 64 MB of RAM and less than 15 MB of hard drive space.

A single user license costs just \$29.95 US and includes user support and free upgrades. A free evaluation copy of Belltech's Business Cards Designer Pro 2.0 can be downloaded on the Belltech site at:
