

Insurance Office Broken Into – Computers Stolen – The CyberAngel Recovers Computer, Arrest Solves 10 Break-Ins

LIMA, OH – May 19 (SEND2PRESS NEWSWIRE) – CyberAngel Security Solutions, Inc. (CSS, Inc.) is fighting crime in a big way in Lima Ohio. On April 29th, an insurance office was broken into and several items, including a sales laptop, were stolen. Fortunately, the company uses The CyberAngel Software (www.thecyberangel.com) as a comprehensive information security and compliance solution for all of their computers.

That night, the stolen computer was used and started sending covert alerts to The CyberAngel Security Monitoring Center, providing the location details from where that computer was being used. CSS, Inc. alerted local law enforcement authorities and provided them with the location information to be able to secure a search warrant for the premises. The thief was arrested, and confessed to another 10 burglaries of businesses in the area. The police not only recovered the stolen computer, but also many items stolen from several

of the other burglaries.

Upon the laptop's return, the owner was relieved to see that all of her company and client's business information were still secure and intact, protected by The CyberAngel's encryption technology.

"I am so thrilled to get my laptop back, and am very impressed with the CyberAngel technology," raved Tina D.. of Lima OH "They were able to tell the police where that computer had contacted them from, and made their job easy. I think that's some of the most beautiful detective work I've ever seen."

Information and Identity Theft due to a stolen computer is on the rise, and the importance of data protection and recovery options becomes more apparent. Recent CyberAngel recoveries include Santa Rosa CA, Frederick MD, Albuquerque NM, and Pittsburgh PA, and with a recovery ratio near 85%, The CyberAngel is helping fight back. The CyberAngel is a proven security solution, providing Real Time Information Security and Tracking & Recovery for lost or stolen computers, and offers real value to the desktop, laptop, and tablet computer markets.
