

Abidia Wireless 3.0; Mobile eBay Auction Software now Available for Palm OS Platform

SAN JOSE, Calif. – PalmSource Mobile Summit & DevCon – May 24 (SEND2PRESS NEWSWIRE) – Abidia, the leading provider of mobile phone and wireless handheld device solutions for online auctions, today announced the availability of Abidia's third generation wireless application for eBay on the Palm OS(R) platform, enabling effortless real-time access to eBay accounts and listings for mobile devices worldwide. The next generation technology features a convenient auction experience comparable to a personal computer on the eBay site, in performance, presentation, productivity, and convenience. Additionally, Abidia Wireless 3.0 offers a streamlined and improved interface allowing instant access to eBay auction information.

Send2Press® Newswire

Synopsis: Abidia Wireless enhances the eBay auction platform with effortless anytime anywhere access from wireless mobile devices and mobile phones; featuring customizable real-time synchronization with eBay accounts, wireless searching, cached browsing, wireless bidding, and the ability to effortlessly manage auction listings on-the-go directly from a Palm Powered(TM) device.

Abidia Wireless 3.0 for Palm Powered(TM) devices, with an Internet connection, builds upon the popular application from Abidia, providing mobile devices effortless real-time access to a users' account and listings from the eBay site, as well as many international eBay sites. Abidia Wireless version 3.0 makes a convenient auction experience possible; users are allowed to view

real-time information about items that have been won, lost, bought, and sold. View and add items to the watch list. View any items' current bid price, an image, or compare prices of other auctions. Abidia Wireless 3.0 makes it easy to carry item listings and visual images as well as buyer and seller lists in your pocket. Easy, on-the-go supervision of real-time auction status is a simple install away.

"Abidia Wireless is a convenient way to keep connected to eBay, wherever you are. The easy setup, simple interface, and powerful features combined with a Palm Powered device provide a top notch enhancement to eBay," said Mike Burch, chief technical officer of Abidia. "Expanding the functionality of Palm Powered mobile devices and smartphones, Abidia Wireless 3.0 offers users instant, real-time access to constantly changing eBay auction data," said Larry Berkin, director of developer marketing, PalmSource. "Auction buyers and sellers can now benefit from tracking their auctions while on-the-go."

Abidia Wireless 3.0 Compelling New Features

- * *Completed Auction Searching – Search completed items with Abidia Wireless.*

- * *On Device Registration – Register for an eBay account directly from your device.*

- * *Auction Item Listings – You can read the item listings directly from your device.*
