

VoiceInM@il Offers Unified Long Distance Messaging to Internet Connection without Hardware/Modem

PALM SPRINGS, Calif. – June 6 (SEND2PRESS NEWSWIRE) – VoiceInM@il Systems Corp. (www.voiceinmail.com) has launched new VoIP capabilities utilizing its Tele2Net technology. The company offers a unified messaging system for sending voice e-mails and having your e-mails read to you.

Send2Press® Newswire

When you receive an e-mail in your account, VoiceInM@il Systems will call you on the phone and read the message to you. Using the FollowMe system, a user accesses the 800 number, enters the recipient's extension, the system calls all known numbers of the consumer and makes a live connection.

VoiceInM@il Systems Corp. is headed by Larry DeBusk, President, and operates under a series of patents developed for unified messaging and VoIP technologies.

After beta testing the Tele2Net and VIM 2007(tm) user options for the past six months, Mr. DeBusk is now ready to move his partner programs to expand the system for global needs. "Our VoIP pricing will ultimately be the least expensive for one reason...no modem fees," confirms Mr. DeBusk.

VoiceInM@il Systems Corp. is currently designing the merger of two

technologies into one convenient service. Larry DeBusk, President, states, "In today's world, no one should have to use anything but a cell phone to conduct daily business."

VoiceInM@il Systems Corp. offers customers the freedom to use cell, office, home or public telephone to dictate or listen to e-mail messages. When you are away from your computer, VoiceInM@il Systems Corp. makes it easy without connecting to the internet using a VoIP modem.

VoiceInM@il Systems Corp. Vice President, Kitty DeBusk, adds, "The company's motto ('Office In Your Pocket') is now a reality and enables any person to utilize this service, even if you do not own a computer."

VoiceInM@il Systems Corp. is actively seeking ISPs, Telecomms and Cable providers for licensing.

Partnerships are available.
