News Broadcasters Worldwide Choose INTELLIscribe 3.2 for News Script Printing

IDAHO FALLS, ID — June 15 (SEND2PRESS NEWSWIRE) — Brooks Internet Software, Inc. (www.brooksnet.com) today announced the immediate availability of INTELLIscribe(R) 3.2, a program designed to make document distribution and printer management simple and inexpensive.

Large media companies and other organizations have realized the value of INTELLIscribe's document distribution features. News broadcast stations are using INTELLIscribe to solve one of their age-old problems: quickly printing multiple copies of newscast scripts on different colored stock. INTELLIscribe resolves the issue with its broadcast printing feature, enabling news scripts to be printed simultaneously on multiple, common network printers, each loaded with different colored stock (lpr.brooksnet.com/newsroom-script-multiple-print.html).

Before INTELLIscribe, printing multiple, colored copies of a script was tedious and time-consuming. Now news stations can rely on INTELLIscribe to print scripts generated from their existing newsroom systems (iNEWS(tm),

ENPS(R), and others) quickly and reliably.

"News broadcasters have found an inexpensive, easy-to-use product that meets a basic, latent need. Any studio can install INTELLIscribe and immediately simplify the script printing process," commented Jared Miller, Sales and Marketing Director at Brooks. "Printing news scripts is a pretty basic function, but it is critical to every broadcast, everyday."

INTELLIscribe 3.2, in line with Brooks' mission, is a high-quality, cost-effective, easy-to-use printing solution. This release includes drag-and-drop with enhanced reprint capabilities, expanding INTELLIscribe's core features: broadcast and failover printing, destination balancing and round-robin printing. The optional Shared Print Activator (SPA) module transforms INTELLIscribe into a powerful print server, allowing other network users access to INTELLIscribe's key features. With INTELLIscribe in place, newsrooms and other organizations can experience simplified document distribution and improved printer management.

Pricing and Availability

INTELLIscribe 3.2 for Microsoft(R) Windows(R) NT, Windows 2000, Windows XP, Windows Server(R) 2003, Windows ME, and Windows 98 is immediately available from Brooks' authorized resellers and online at http://lpr.brooksnet.com. INTELLIscribe can be purchased for $69 per computer ($57 gov/edu). The SPA module can be purchased for an additional $226. For upgrade pricing information, contact Brooks. With the release of INTELLIscribe 3.2, INTELLIscribe 3.1 will no longer be available for sale as of June 15, 2005.
