

Stolen Computers Recovered by The CyberAngel – Critical Information Protected...Never a Threat of Compromise

NASHVILLE, Tenn. – June 27 (SEND2PRESS NEWSWIRE) – CyberAngel Security Solutions, Inc. (CSS, Inc.), a leading provider of data protection and computer recovery, is making headlines across the country by recovering stolen computers at a record pace. Within the past 10 days, recoveries of stolen computers were made in Memphis TN, Charlottesville VA, Indianapolis IN, and St. Cloud MN, all 4 a result of office break-ins. The files on those computers were a mix of confidential business and client information, some containing sensitive financial and medical information. With The CyberAngel Software protecting that information, no threat of compromise ever existed.

The CyberAngel Software is a unique patented security and compliance tool, providing Single and Two-Factor Authentication, Data and Information Protection, Unauthorized Remote Access Restriction, as well as Tracking and Recovery. For over 9 years, and with an 83% recovery rate, The CyberAngel has been helping companies and consumers fight back.

"I cannot thank the people at CyberAngel enough." exclaimed Vickie L.. of

Charlottesville VA “They really worked hard to coordinate the recovery efforts with the police. Without The CyberAngel, we would have never recovered that computer, since it was a new employee responsible for the theft.

“After they broke into my home and stole my laptop, I figured that was the last I would see that computer.” noted Michael B. of Memphis TN “But the folks at CyberAngel were right on top of it, and had the computer tracked within days. I am a true believer in The CyberAngel now!”

“Just like the media headlines report, we have seen a marked increase in computer theft, and as a result, our recoveries are on the rise.” said Bradley Lide President of CyberAngel Security Solutions, Inc. “We bring great value to the client by protecting their critical information, the victim by recovery of their stolen computer, and to the community by helping remove criminals from the street. The best part of our job is making that call to the victim, letting them know that we have recovered their stolen property.”
