

In the New Age of VoIP and Telephone Number Portability 'Promotional Telephone Numbers' Online Registry Helps Businesses Find Hard to Get Vanity Phone Numbers

LOS ANGELES, Calif. – August 18 (SEND2PRESS NEWSWIRE) – Promotional Telephone Numbers, (www.PromotionalTelephoneNumbers.com) in association with its sister website www.vanitytel.com, today announced the launch of their new online service designed to make it easier for business and professionals to find and obtain desirable and memorable telephone numbers which are compatible with their business.

"PromotionalTelephoneNumbers.com helps business and professionals obtain hard-to-get vanity telephone numbers which actually describe and promote their enterprise or occupation," said David Zolty, President of Promotional Telephone Numbers. "Every business needs a great and memorable telephone number. A really good telephone number can increase sales dramatically."

Promotional numbers should spell the business name, describe what the business does or just simply be easy to remember. The problem is that these numbers are rare and hard to come by. That's where www.PromotionalTelephoneNumbers.com can help. With a registry of available telephone numbers which are perfectly compatible with many businesses and occupations, clients can easily search the database to find a suitable number.

"If someone is about to open a medical clinic in Baltimore, that individual may want to think about securing a number like 410-DOCTORS," said Zolty. "Or an auction house in Los Angeles would have 310-AUCTION available to it. A consultant in Toronto may choose 416-CONSULT, and an insurance company or agent in San Francisco would look at 415-INSURANCE. Any quality business in Chicago may consider the number 312-QUALITY. These numbers and more are now available at www.PromotionalTelephoneNumbers.com."

Promotional Telephone Numbers' new and unique service comes at a time when users and corporations are migrating en mass to Internet based telephone services, called VoIP. With VoIP, country & area codes are quickly losing their geographical relevance, causing a vast amount of phone number relocations. The demand will increase as globalization further expands and countries like China, India and Singapore seek a greater North-American presence.

"With the recent introduction of number portability, where a cell phone number can be converted into a landline, the possibilities of getting a compatible business numbers have greatly improved," said Zolty. And now with

www.PromotionalTelephoneNumbers.com, finding the right number to promote a business or profession is fast, efficient, and affordable.
