

# Books Give New Dimension to Spirituality

**The Bookmark's new catalog offers books that define the unseen realm of intelligence underlying the universe.**

SANTA CLARITA, Calif. – September 30 (SEND2PRESS NEWSWIRE) – The Bookmark, of Santa Clarita, California, is pleased to announce the release of its 2006 catalog. This all-new catalog contains the most comprehensive offering of Christian Science publications available anywhere. The free catalog offers a wide range of literature from the early writings Mary Baker Eddy, Bicknell Young, Edward Kimball, and Martha Wilcox, to the contemporary books of Richard Claude Haw and Ann Beals.

Christian Science was founded on the symbiotic relationship between science, religion and the healing power of prayer. It provides a comprehensive explanation as to how they are directly related to today's growing conviction that the universe is the effect of an intelligent Cause. The Bookmark's wide array of books and writings provide the most complete and accurate explanations of this newly discovered spiritual dimension available today.

Through a wide variety of authors, both traditional and contemporary, the Bookmark's publications help establish the one Principle, one Cause, one Mind, and one system of ideas that defines the structure and content of this hidden realm. The books and writing presented in the new Bookmark catalog connects the readers with this hidden dimension and makes these amazing healing powers readily available to everyone.

"This dimension is different from our minds. If it were like us, we could easily understand it," said Ann Beals, President of the company. "Because it is so unlike the human mind, we need some way to begin relating to it. Christian Science opens up this realm beyond the senses. It correctly defines its nature and reveals the healing power latent in it."

Christian Science was first introduced to the world in the late 1800's. It was so visionary that it met with great resistance and ridicule. Today the world is beginning to agree with the controversial statements made by the discoverer and founder of Christian Science, Mary Baker Eddy. And after more than a century her writings remain so clear and insightful that they are still the single most reliable definition of this hidden realm to date.

Though considered a modern religion, Christian Science is actually a very advanced scientific discovery, essential to the continuing evolution of civilization. The Bookmark's all-new 2006 catalog offers the world's widest selection of both classic and contemporary publications that open up the door to new dimension of spirituality and explain how to understand and relate to it, and how to draw on its healing power.

Call, write, or email for your free copy of the all-new 2006 catalog. Available from The Bookmark, P.O. Box 801142, Santa Clarita, CA 91380. Phone:
