

Tibersoft Announces Red Robin Gourmet Burgers Chooses Tibersoft IQ Solution for Supply Chain Cost Control

WESTBOROUGH, MA (SEND2PRESS NEWSWIRE) – Tibersoft, the expert in food cost control systems for the foodservice industry, announced that Red Robin Gourmet Burgers, Inc., the casual dining company that serves up wholesome, fun, feel-good experiences by offering its guests high-quality gourmet burgers and innovative menu items in a family-friendly environment, will utilize Tibersoft IQ to provide timely and accurate product movement information.

Send2Press® Newswire “Tibersof

t IQ can assist Red Robin and its field operators and franchisees by providing automated reporting for price protection, which translates into lower food costs, and helps support food cost controls across multiple distribution points,” said Tibersoft CEO Keith Enstice. Enstice attributes this decision as a vote of confidence in Tibersoft’s solid track record of delivering timely and accurate product movement information for restaurant operators.

Enstice added that “our clients continue to tell us that our approach makes a difference in delivering actionable information to lower food costs and leverage their purchasing activities.”

About Tibersoft Corporation (www.tibersoft.com)

Tibersoft provides timely, accurate product movement information to the foodservice industry. By working closely with all the supply chain participants, the company enables operators and manufacturers to both form and grow tighter and more transparent relationships. Tibersoft's subscription-based data management and analytical services are helping leading operators including The Cheesecake Factory, Buffets, Inc., Aramark, Five Star, Marie Callender's, Valley Services, Delaware North Corporation and dozens more to lower food costs and leverage their purchasing activity.

These same technology services are making it possible for their manufacturer clients to enjoy greater visibility into the sale of their products to key operators through their distributors. The quality and accuracy of this information enables the manufacturers to optimize their sales, control trade spending and reduce contract compliance problems.
