

# PreViser and OralCare Corporation Partner in Japan to Provide Oral Disease Risk Assessment

MOUNT VERNON, WA (SEND2PRESS NEWSWIRE) – PreViser Corporation ([www.previser.com](http://www.previser.com)), a Washington State-based provider of patented oral disease and risk assessment software technology to the dental industry, announced today the finalization of a licensing agreement with OralCare Corporation of Tokyo, Japan to market PreViser technology to dentists within Japan.

OralCare will have responsibility for the translation of PreViser's assessment report language provided to patients and dentists into the Japanese language, and will focus their marketing efforts on the over 15,000 Japanese dentists that are currently customers for OralCare's extensive suite of preventive dentistry products.

Kiichi Ohtake, President of OralCare, stated, "My company has been dedicated for many years to promoting the concepts of preventive dentistry to dentists through education. PreViser's ability to identify patients that will benefit from prevention and disease management services will enhance our efforts in this area significantly. We have a natural customer base of dentists who care deeply about preventing disease, who not only help make their patients healthier, but build more successful dental practices than those clinicians not practicing preventive dentistry."

Carl Loeb, Chief Executive Officer of PreViser, noted that "OralCare is a respected leader in disease management in Japan. We are very pleased to be able to partner with a firm as well respected and as well positioned as OralCare is in their market segment."

Launch of the Japanese version of PreViser's technology (the Oral Health Information Suite(TM)) is expected to occur during the third quarter of 2006.

PreViser Corporation provides web-enabled diagnostic decision support tools for dentists and dental hygienists. The PreViser Oral Health Information Suite(TM) enables quick, accurate, reproducible and objective diagnosis and analysis of oral disease risk in an easy-to-understand format for the dental professional and the patient. To learn more about PreViser or to download the software for free, visit <http://www.previser.com>.
