

It's a Wrap for the iPod

iPod Nano and iPod Video WraptorSkinsz Provide Durable, Decorative Scratch Protection Without Bulking Up Your iPod

CEDAR RAPIDS, IA (SEND2PRESS NEWSWIRE) – iPods keep getting smaller and the consumers like it. But if they want to protect their investment their options were big silicon skins and cases or iPod tattoos (iPod stickers). Either choice would prevent scratches but each has its flaws. WraptorSkinsz from Matrix Productions, Inc. are the best of both. WraptorSkinsz are thin wrapping protective skins that do not add bulk yet are not stickers. The complete line of WraptorSkinsz for the iPod Nano and iPod Video (5g) seen online at www.TuneTattoo.com.

Send2Press® Newswire "The

consumer wants more of less." says Matrix Productions, Inc. President Dennis Turkington. "Our TuneTattoo product line has been available since early 2005 and has been extremely popular with iPod users and we get a tremendous amount of feedback from them. What most have shared with us is they wanted something like TuneTattoo but it couldn't be a sticker, had to be re-usable, they needed to be durable and finally they must be thin. We have spent the last eight months developing our new product and the WraptorSkinsz product line fulfills their needs."

WraptorSkinsz are available in a variety of designs and colors. Each package includes a WraptorSkinsz full wrap skin which covers the front, back, sides and click wheel, a screen protector, a plastic application squeegee for removing air bubbles and a hard plastic storage case. Un-like many iPod wraps

currently on the market, WraptorSkinz are not stickers. They use no glue or adhesives to stay on the iPod making them removable and reusable. Much thinner than the traditional silicon cases, WraptorSkinz are compatible with most iPod accessories and are still extremely durable.

Matrix Productions Inc. founded in 1992 develops web graphic templates and internet based technologies and products for corporate and consumer clients. Matrix Productions has been manufacturing iPod related protective accessories since early 2005.
