Atreus Systems Introduces Automated Provisioning for IP Multimedia Subsystem (IMS)-Based Services

Atreus Helps Service Providers to Evolve VoIP Offers to Leverage IMS Capabilities

SAN JOSE, CA (SEND2PRESS NEWSWIRE) — Spring VON — Atreus Systems(TM) today announced the launch of its IMS Service Provisioning Solution for wireless and wireline service providers. Having established itself as the leading OSS supplier for VoIP and next-generation IP services, Atreus now empowers carriers to deliver a compelling array of converged offerings to any customer, using any device, on any fixed or mobile IMS network. Atreus is currently working with several leading carriers to launch offerings that include IP Telephony, Conferencing, Hosted Call Center, Unified Messaging, and Voice Networking.

Send2Press® Newswire

The Atreus xAuthority(TM) solution gives service providers the ability to seamlessly extend their current bundles to include the incremental features made possible with IMS, while preserving the simplified and streamlined operational process which are the hallmark of the xAuthority software. Atreus xAuthority(TM) plays a vital role within fixed-mobile networks, providing a number of crucial IMS provisioning functions, including support for multi-service, multi-vendor solutions; dynamic self-service registration; real-time

portal driven employee configuration; and controlled migration from legacy to IMS-based networks.

"With our successful track record and experience, Atreus is strongly positioned to help providers migrate to IMS and achieve first-mover advantage by accelerating deployments with a wide range of advanced multimedia applications," said Doug Bellinger, Chief Technology Officer, Atreus Systems. "Our robust solution enables multi-service revenue generation over fixed and mobile networks, helping providers to differentiate themselves with rich self-service offerings and flexible pricing models for their customers."

In related news, Atreus Systems was selected by Proxy Magazine's as one of the top ten OSS companies to watch in 2006. Proxy Magazine's "Top 10" features the companies that are best positioned to be IP communications innovators in 2006. The award honors Atreus as the IP service provisioning solution of choice for carriers worldwide and recognizes Atreus' continued leadership in helping large and emerging providers solve the critical service delivery challenges in deploying rich IMS-based applications.

Visit Atreus at booth 1133 of the VON Conference in San Jose, from March 14-15, 2006

Learn how Atreus is helping communications providers win new business and lower costs with Atreus' automated provisioning and customer self-management solutions for IMS, VoIP, and advanced multimedia applications.

Atreus Systems, in conjunction with Lucent, Sylantro Systems and IDC have been enlisted to present at Spring VON, helping telecommunications providers address the challenges of deploying advanced multimedia applications with IMS-based networks. Ken Workun, Director of Business Development for Atreus, will be presenting on "Delivering Advanced Services with IMS" at Spring VON 2006, which takes place on March 15th, 3:30 – 4:30pm at the San Jose Convention Center in San Jose, CA.
