## Bio

Amy Frost is a person with creativity. She has always been curious of life and what living had to offer. She has always seen the way people lived and wondered a lot about why we have been brought in this world. What is the purpose of life?

She is a graduate from York College with a Bachelor of Science in information systems management. She likes to read, write, learn new software and design web sites. Apart from this, she likes meeting new people and learning about their heritage, likes and dislikes.

From viewing the poems, you can see that the poetry she writes pertains to everyday life and how people have questions about many things. They go through so much and don't have an answer as to why. I hope these poems have touch your life, and that you wander from here to there curious in every direction trying to find an answer.
