

Southern Software, Inc. Deploys Integrated M2SYS Fingerprint Software within Jail Management Platform to Multiple Detention Centers for Positive Inmate Identification

Leading Provider of Software and Services for the Public Safety Industry Provides Detention Centers with Powerful Fingerprint Biometrics Software to Create Efficiencies and Safeguard Public Interest

ATLANTA, GA – May 11 (SEND2PRESS NEWSWIRE) – M2SYS Technology, a biometric technology research and development company, announced today that Southern Software, Inc. of North Carolina, a leading provider of municipal and public safety products, has successfully integrated the M2SYS Bio-Plugin(TM) fingerprint software technology into its Jail-Pak(TM) inmate management application and has deployed it to detention centers in Roanoke, VA, Benton County, AR, Hamblen County, TN, and Uvalde County, TX. The software is being used to identify unknown inmates at the point of entry, track inmate movements and activities, and verify identity prior to release, creating operational efficiencies and bolstering security.

Send2Press® Newswire "M2SYS

offers very robust, scalable, server-based fingerprint software that we

rapidly integrated without expending valuable resources,” noted Larry Caddell, CEO of Southern Software, Inc. “In addition, their partnership and pricing model provides the opportunity to open a new revenue channel while keeping the biometric software affordable for our customers. The jails currently using the software have reported very positive results with accuracy rates of 100%. We already have additional facilities lining up to implement this extremely valuable biometric technology.”

“The pace at which Southern Software was able to integrate and begin deploying a fully developed, seamless fingerprint software system shows the true power and viability of our Bio-Plugin(TM) biometric adoption methodology,” commented Michael Trader, President of M2SYS. “With this innovative method of transforming any biometric technology SDK into a rapidly integrable, enterprise-level system, M2SYS offers unparalleled flexibility to software developers and is accelerating the growth of biometrics in our marketplace.”

About M2SYS Technology

M2SYS Technology, www.m2sys.com, is a forward thinking biometric research and development company. Its portfolio includes Bio-Plugin(TM), a patent-pending integration methodology that software providers can use to rapidly adopt a seamless, server-based biometric technology system with minimal development effort.

About Southern Software, Inc.

Southern Software, www.southernsoftware.com, offers state-of-the-art public safety software at competitive prices backed by outstanding service. Southern Software has been in the public safety and municipal software arena since 1988.
