

Skyline Software Systems, Inc. Announces SkylineGlobe.com – an Interactive 3D Web Mapping Service

SkylineGlobe delivers a complete 3D global mapping solution for consumers and businesses

CHANTILLY, VA – June 13 (SEND2PRESS NEWSWIRE) – Skyline Software Systems, Inc., announced today the SkylineGlobe.com 3D web mapping service. This turn-key 3D earth online combines massive amounts of high resolution satellite imagery, aerial photography and map data with Skyline's leading 3D visualization technology to deliver a complete 3D web mapping solution for consumers, businesses and developers.

SkylineGlobe.com is a new, 3D model of the world online, open for public access. A free open API allows anyone to create new tools and features for public or private use. Skyline offers a commercial version of the SkylineGlobe service to organizations that would like to embed this 3D global visualization platform on their own website with custom content exclusive to their domain. Skyline Globe runs inside a regular web-browser, and brings both commercial and government geospatial applications to life in industries as diverse as Travel and Tourism, Real Estate, Social Networks, Urban Planning, Entertainment, and Utilities.

"Unique features such as community and collaboration tools, realistic 3D cities, live video and open interfaces all come together to create a powerful platform," said Ronnie Yaron, president of Skyline. "The ability to quickly create your own applications and connect directly to real time data of any type opens the door to a whole new world of online applications."

SkylineGlobe will be available to the general public within a few weeks. Developers and partners can gain access to a beta version now by registering on SkylineGlobe.com

About Skyline Software Systems

Skyline Software Systems, Inc. is a leading provider of 3D earth visualization software and services. The company offers a comprehensive platform of applications, tools and services that enable the creation and dissemination of interactive, photo-realistic 3D environments. Skyline technology works on any platform including desktops, wireless handheld devices and in-vehicle systems and over any type of network, including secure intranets, private extranets and the Internet. Skyline is headquartered in Chantilly, VA.
