

# Immersion Graphics is Selected as One of Top 50 System Integrators in the Industry by Systems Contractor News

COMMERCE, MI – June 21 (SEND2PRESS NEWSWIRE) – Immersion Graphics Inc., a leader in providing the Detroit automotive industry with advanced audio / visual solutions, continues to grow and has been recognized by Systems Contractor News (SCN) as one of the Top 50 Systems Integrators in the audio / visual industry.

Send2Press® Newswire SCN's

list of Top 50 Systems Integrators was based on revenues from system integration sales – not just total revenue. This year's selection was published in the December 2005 issue and was sorted by estimated revenue from commercial audio / visual installations for 2005 and then by total revenue.

Immersion Graphics is a full service audio / visual integrator and a leader in providing the automotive industry with advanced visualization systems, such as PowerWalls and custom fabrication of multiple rear projection systems. Immersion Graphics provides: product sales, rental equipment, consulting, design, engineering, control system programming, custom fabrication, installation, service, and maintenance. Product sales include LCD/DLP projectors, plasma & LCD monitors, video conferencing systems, AV furniture, audio systems, control systems, and projection screens.

"We are very pleased to be recognized as a leader in system integrations by

SCN. We continue to grow by adding value to our clients by providing advanced audio / visual solutions. Systems integration is a critical component to our success," said Pat Hernandez, President of Immersion Graphics.

"Immersion Graphics revenues are expected to grow by over 30% in 2006, and we contribute this success to our ability to bring audio visual technology to reality for our clients through custom solutions and systems integration," said Craig Ingram, Director of Sales & Marketing of Immersion Graphics.

#### **IMMERSION GRAPHICS INC.**
