

Polygal Announces Energy Advanced Glazing

Polycoolite(TM) Lets in Light and Keeps People Comfortable

CHARLOTTE, NC – July 21 (SEND2PRESS NEWSWIRE) – Polygal Plastics Industries Ltd., the world leader in the design, manufacture and marketing of Polycarbonate and Polypropylene structured sheets and advanced glazing systems has announced its energy-advanced Polycoolite(TM) is now available in Triple Wall, 16mm sheets for skylights and solarium environments.

Send2Press® Newswire

In addition to blocking harmful UV rays, Polycoolite(TM) structured sheets provide 100% light diffusion. That means environmental comfort for people and plants. The ultra-rigid sheet supplies unmatched strength under high wind and heavy snow loads. Their resistance to chemicals and other damaging elements thrive in a wide variety of industrial applications used by architects, structural engineers and roofing builders. For qualified professionals,

Polygal offers an AutoCAD library of product drawings created by a certified architect with over 15 years experience in building design. This library and product details can be downloaded from their website or delivered on CD-ROM.

Polygal Industries also offers boxed sample sets of its various Polycarbonate

sheet products to ensure its customers receive the right product for their specific environment. Technical support and project planning services are offered in English, Spanish, French, Russian, and Portuguese.
