

5th Largest School District in America Chooses Caselite Software's Therapy-Scheduling and Analysis Program for Speech-Language Pathologists and Administrators

LAS VEGAS, Nev. – Sept. 6 (SEND2PRESS NEWSWIRE) – In a time when several states are facing critical shortages of school-based SLPs, progressive districts like Clark County are finding creative ways to attract and retain their talent. With over 300,000 students in more than 300 schools, Clark County School District (CCSD) in Las Vegas, NV, is the 5th largest and fastest growing school district in the country. Caselite Software specializes in online therapy scheduling for school-based Speech-Language Pathologists and analytical reporting for their District Administrators.

"We are excited to be implementing Caselite this year and hope that eliminating pen-and-paper scheduling will make life a lot easier for our Speech-Language Pathologists," Judy Moseley, Director of Speech-Language Therapy & Audiology Services at Clark County School District, said. "We look

forward to the program addressing the many scheduling challenges SLPs face, and in turn we expect it will assist us in our recruiting and retention efforts,” added Moseley.

“It is not just about how fast Caselite creates schedules, it is about providing the school-based SLP with a tool to create a better schedule,” said Caselite Software President and Founder, Marc T. Calello. “A better therapy schedule translates into a better work week, where SLPs can have more control of how they manage their time,” added Calello. Moseley went on to say, “We chose Caselite so that our SLPs will be able to create their initial schedules with ease and quickly make multiple revisions to their schedules throughout the year.”

Caselite Software was born out of necessity. The company, headquartered in Charlotte, NC, was founded by Marc T. Calello, a software engineer, and his wife, Monica Calello, M.S., CCC-SLP, to solve her scheduling needs while working in the local schools. The endless hours of scheduling, paperwork, and therapy planning, prompted the Calellos to fill a much-needed niche in the market.

New features appearing in the most recent release of Caselite 3.0, currently in use at CCSD, allow District Administrators to view schedules and corresponding caseload data in graphical analysis and detailed- reporting formats that are distinctly unprecedented. The program is subscription based and a free online tour and video demonstration of services is offered.
