

AMT Datasouth Begins Shipping Fastmark M2 Portable Printer

ARCHIVAL CONTENT

CAMARILLO, Calif., Sept. 12 (SEND2PRESS NEWSWIRE) – AMT Datasouth Corp. (www.amtdatasouth.com), a leading supplier of value added printing solutions, announced today that the Fastmark M2 battery powered portable thermal bar code printer is now available. The Fastmark M2 is supplied with AMT Datasouth's proven proprietary PAL programming language.

AMT Datasouth recognized the need for mobile barcoding and label printing applications where the printer needs to interface with legacy systems or where changing systems to support new applications is not practical. The Fastmark M2 with PAL meets these needs.

AMT Datasouth's proprietary PAL printing and programming language easily enables users to interpret, translate, filter and add to almost any data stream sent from any host running any application. Some of the vertical markets served by PAL include, healthcare, pharmaceutical and warehousing among others.

The Fastmark M2 printer is rugged, lightweight and durable. Designed to survive a six-foot drop, the Fastmark M2 printer is also easy to use with its big multi-line LCD display, intuitive menu system and easy to load internal roll-holder.

AMT Datasouth Corp. is a leading supplier of specialty printers for the bar code, travel automation and forms printing markets since 1983. Headquartered in Camarillo, California, AMT Datasouth has engineering and manufacturing operations in Charlotte, North Carolina. AMT Datasouth sells its products through value added resellers and OEM's worldwide.
