

# Bitflow VoIP Inc. Selects Atreus IP Service Provisioning Solution for Wireless and Residential VoIP Launch

## Atreus' Provisioning Software Automates BroadSoft BroadWorks(R) to Speed VoIP Service Delivery

OTTAWA, ON, Canada – Oct. 16 (SEND2PRESS NEWSWIRE) – Atreus Systems(TM), the leading supplier of provisioning software for VoIP, IMS and advanced IP service bundles, today announced that Bitflow VoIP Inc., has selected Atreus' IP Service Provisioning Software to speed the deployment of its wireless and residential VoIP service offering.

“As we continue to expand our customer base nationally and internationally we’ll require scalable and cost-effective solutions that will help us successfully deliver and manage wireless and VoIP offerings,” said Alexandre Sennett, CEO, Bitflow VoIP. “Atreus provided us with an extensible provisioning solution for BroadSoft, which will help us meet the growing demand for our service offerings by streamlining operations and business processes while providing self-management capabilities to our customers.”

Pre-integrated with BroadSoft, Atreus is empowering Bitflow to automate service ordering and provisioning using intuitive, self-management portals. By simplifying complex provisioning flows, Atreus will enable Bitflow to deploy feature-rich wireless and VoIP bundles rapidly, while reducing the cost and complexity of modifying features and managing customer growth.

“Atreus will play a critical role in helping Bitflow launch its wireless and residential VoIP service,” said Andrea Baptiste, CEO, Atreus Systems. “Together with BroadSoft, we’ll enable Bitflow to roll out superior VoIP offerings, while giving them the scalability to grow their VoIP business and manage a full range of advanced IP services.”

## Become Operational Quickly with Residential, Business and Wholesale VoIP Offerings

Atreus' IP Service Provisioning Solution empowers service providers to quickly become operational with a fully-featured VoIP service, enabling providers to successfully turn up, bill and manage subscribers. Atreus' customer self-management solution allows providers to simplify market trials and rapidly introduce revenue-generating communications bundles to residential, business and wholesale markets. Atreus delivers pre-integrated provisioning and configuration for a variety of VoIP devices, including soft switches, feature servers, media servers, ATAs, IADs and IP phones; helping

providers to speed service introduction by streamlining all the steps required to successfully become operational.

With Atreus, providers extend self-management to the end user, putting them in control of service ordering, feature changes and updates. The result – providers quickly deploy VoIP bundles, while dramatically reducing the time, cost and complexity of adding new offerings, modifying features, and scaling customer demand. In addition to VoIP, Atreus delivers the industry's largest library of provisioning modules for advanced IP services, including wireless offerings, messaging, voice VPN, conferencing, hosted call center, presence, and collaboration services, to name a few.
