

'Vandal Shields' Prove to be a Tough Defense against Vandalism

LOS ANGELES, Calif. – Nov. 14 (SEND2PRESS NEWSWIRE) – Vandalism is a problem that is spreading everywhere, from large metropolitan cities to rural housing communities. The growing trend of vandalizing outdoor lighting fixtures has caused an alarming increase in safety issues, liability, and maintenance costs. Aero Themic Shields has spent years partnering with city officials, housing authorities, park departments, and electric utilities to help prevent lighting vandalism and save money.

Send2Press Newswire Their complete product line of vandal-proof, bullet-resistant polycarbonate Vandal Shields were created to be easily affixed to an existing light fixture to stop the impact of rocks, sticks, bats, other projectiles, and up to .44 caliber bullets from penetrating to the light source.

Customers have cited a complete elimination of the problems they previously faced, in addition to obtaining a 100% return on investment upon the first failed vandalism attempt. Vandal Shields allow the lights to stay on, restoring safety and minimizing maintenance costs.

Vandal Shields are available to protect most outdoor light fixtures: Roadway, Area, Architectural, Flood and Pathway.

For more information about Vandal Shields, contact Aero Themic Shields at (800) 698-2402 (info@vandalshields.com).
