

SaberData, Ltd. Rolls Out PC Personality Clone PC Migration Product

AUSTIN, Texas – Dec. 12 (SEND2PRESS NEWSWIRE) – SaberData, Ltd., an emerging provider of PC migration solutions, announced PC Personality Clone, a new product designed to allow consumers and small business owners to easily migrate application data, settings, and more from one PC to another. Consumers face the hassle of transferring data from an old computer when a new one is purchased. The process of securely and efficiently transferring information can be problematic and the procedures complex.

“Even consumers buying their second or third computer do not know how to easily move information from their old PC to their new one. Oftentimes, this diminishes the experience of using the new PC,” said Tom Dye, President of SaberData. “With PC Personality Clone, users will see how simple and secure it is to move their information and PC configuration.”

PC Personality Clone allows direct connection of the old and new PCs via a supplied USB “Smart” cable which eliminates the need for a high speed network connection or for burning multiple CDs. The software provides a simple interface for selecting data, application settings, email accounts, templates, themes, printers, and network settings. PC Personality Clone also migrates all pictures, videos, music files, and other content residing on the old PC.

“We’ve simplified the procedure to clone your old PC” said Tom Dye, SaberData’s President. “Now consumers have a simple tool for migrating the contents of their old PC to a new one. The included USB cable gives them everything they need in the box,” Dye added.

PC Personality Clone is the essential product to accompany any new PC this holiday shopping season. Tom Dye is confident about the product’s continuing success. “With its ability to move data quickly and easily, PC Personality Clone is an essential tool for saving new PC owners hours of time and headaches. As we move into the holiday season and the launch of Vista early next year, we expect that PC Personality Clone will take an even more commanding sales lead.”

PC Personality Clone is available for \$69.95 and can be purchased at www.SaberData.com.

About Saberdata, Ltd.
