

New Technology Business Directory, Computerstreet.net, Goes Live

STREETSBORO, Ohio – Feb. 7 (SEND2PRESS NEWSWIRE) – Tierce Enterprises, LLC is pleased to announce the introduction of a new website designed for the consumer AND the business. Computerstreet.net – “Your Source for Reliable Technology Business Reviews.” Search the database of 150,000 nationwide technology related businesses to find a company by city, state, zip code, name or browse an entire city.

Send2Press® Newswire

Computerstreet.net allows the consumer to review and rate the companies.

Susan Sigman, President, says that “Once submitted, your review will be looked over by a ComputerStreet.net staff member for relevance before being posted live. People can now feel secure when seeking technical service and sales. All for free.”

Businesses can update or add their information for free as well, or choose a preferred account for a few dollars per month. Each business has its own web page offering Vcard, a map to the location, space to add descriptions of the services they offer and they can add a picture.

“Again, this service is free. A paid account would get customization such as

activity reports, a link to their web site, ads removed from their page, etcetera.”

“We are advertising for the businesses but giving them incentive to keep the consumer happy,” concludes Sigman.
