

HVT Surpasses 150,000 LCD Panels Repaired – Upgraded Facility Paves the Way for Production Upswing

ATLANTA, Ga. – Mar. 20 (SEND2PRESS NEWSWIRE) – Hong Video Technology (HVT), a leading outsource supplier of LCD panel repair and remanufacturing, today announced that it has surpassed 150,000 LCD panels repaired. The achievement is particularly noteworthy because more than one third of the 150,000 panels repaired were shipped in the prior six months. HVT began servicing LCD panels in 2001.

Send2Press Newswire

The surge in LCD panels repaired is due in part to the increased number of panels in the marketplace reaching end-of-life, and corporations continuing their efforts to reduce service-related costs.

*(Photo Caption: LCD panel repair in ESD-controlled workspace with 100% temperature and humidity control assures higher-quality and consistent results.)

The high-quality repair provided by HVT offers a cost-effective alternative to purchasing and replacing defective LCD panels with new panels. In the event a manufacturer has ceased to produce or procure a sufficient quantity of a particular panel at the time of final buy, then HVT offers a reliable source for replacement panels for the entire product life cycle.

The production upswing is also clearly attributed to HVT's continued investment in technology and constant facility improvements. With a class 10,000 clean room deemed largest in the southeastern United States and 100% ESD-controlled environment, HVT can perform integration, product enhancement and repair or rework of increasingly complex display units, which continues to broaden the HVT customer base.

"We're proud of our achievement. It validates the investment we made to upgrade our facility and procure the necessary specialized equipment to stay on top of the latest technological advancements in service. We continue to provide the custom services that world class manufacturers and OEMs require," commented George Hong, President.

"Our facility speaks volumes about who we are and what we can do. We invite everyone who needs the best possible LCD repair and remanufacturing support to come to HVT to see our operation in action," Hong added.

About Hong Video Technology, Inc. (HVT)

HVT is the leading outsource supplier of electronic display repair and remanufacturing for LCD panels, DLP light engines, and other progressive electronic display technologies. For LCD panels, HVT performs a wide range of custom services, including integration, optical enhancement, rework, ACF bonding, quick-turn prototypes and end-of-life support. Customers include manufacturers, OEMs and dealers in the consumer electronics, retail, gaming, auto, marine, computer and other industries. HVT has specialized in electronic display services since 1994.

HVT is certified minority owned and operated.
