

They're Lining Up for Detroit's Liquid Face Lift

STERLING HEIGHTS, Mich. – Apr. 13 (SEND2PRESS NEWSWIRE) – “We no longer need to dream of the ideal treatment to correct sunken cheeks, hollow eye, deep indentations associated with facial fat loss brought on with age,” explains Mark Berkowitz, a Detroit-area Cosmetic Surgeon. SCULPTRA(TM) is a safe, synthetic, and biocompatible cosmetic treatment that gradually and significantly increases skin thickness without surgery, extreme expense, lengthy recovery, or post-procedure pain.

Because Sculptra treatment has little shortcoming and has proven to produce dramatic results for up to two years in clinical studies, Berkowitz is not surprised by the excitement pouring in to his Sterling Heights medical spa, ACCENTS. “Sculptra treatment is well tolerated and has the ability to treat much larger areas than any other wrinkle filler on the market,” states Berkowitz.

Sculptra is a polymer synthetically derived from natural components and is a biocompatible substance. There is no need for skin testing for allergic reaction and Sculptra is administered during a brief office visit. More than 150,000 people in over 30 countries worldwide have been treated with SCULPTRA(TM), under the trade name NEW-FILL(TM), for a variety of facial volume and contour deficiencies. It was approved in Europe in 1999 to increase the volume of depressed areas, particularly for the correction of skin depression, including skin creases, wrinkles, folds, scars, and eye rings. In 2004, the product was approved in Europe for large-volume corrections of the signs of lipatrophy.

Berkowitz has been performing beauty-boosting cosmetic injections for more than 10 years and welcomes the opportunity to educate Detroiters interested in enhancing social interactions limited by frown lines, smokers lips or looking old. Being both knowledgeable and entertaining, Berkowitz interviews well and welcomes questions from the media, listeners and readers alike. His interviews have been featured in The Macomb Daily, on Today's Health and on WDIV.
