

Cimaware Software Releases New Corporate Web Site

MADRID, Spain – July 12 (SEND2PRESS NEWSWIRE) – Cimaware Software has launched their new corporate web site at cimaware.com. The site is home to Cimaware's MS Office file recovery software line, OfficeFIX, that includes recovery utilities for corrupt and damaged MS Access, Excel, Word and Outlook files.

Send2Press® Newswire

New features include Flash demonstration videos of each program, a new corporate image and product design and an Expert Zone that offers a wide selection of tutorials for different MS Office programs.

This new site has implemented the Web Content Accessibility Guidelines (WCAG) to ensure that people with disabilities are able to access the site.

Cimaware Software has also repackaged the OfficeFIX suite (containing AccessFIX, ExcelFIX, WordFIX and OutlookFIX) into 5 different suites. Customers can now choose to purchase all four programs or a combination of any three.

"The new OfficeFIX combo suites will provide our customers with the ability to choose a recovery suite that best suits their specific needs," explains

Laren Eriksen, marketing executive at Cimaware Software. "We are also very excited about the Expert Zone which contains many great articles written by some of the best known authors in the on-line MS Office community."

Cimaware Software is based in Madrid, Spain. The company has been producing data recovery software for MS Office files since 2000. The release of the company's new program, DeleteFIX for Photo, for the recovery of deleted digital camera images is expected in August 2007.
