

Techway Services Impacting Supplier Diversity

DALLAS, Texas – Aug. 9 (SEND2PRESS NEWSWIRE) – Techway Services, Inc. was named to the 100 WBE's Impacting Supplier Diversity in 2007 by Women's Enterprise USA magazine. Techway Services growing profile among Supplier Diversity Managers is due largely to Techway's ability to successfully fulfill contracts, which is giving Diversity Managers the comfort level they need to champion Techway within their corporations.

"Our business is computer remarketing, electronics recycling and data destruction services; however, what our clients are really buying is risk mitigation. This can mean different things to different companies. Some companies need Certificates of Disposal for recycled equipment. Others require onsite data destruction to achieve Federal compliance. Our job is to find out exactly what our clients need and execute. By listening, we're growing."

While Techway Services earned much of its current client base by pitching directly to IT managers, Ms. Coan stressed how vital Supplier Diversity programs have been and will be to Techway's expansion.

"Though rapidly growing, we're still a small company that might pass under the radar of a public company. Supplier diversity initiatives give us a voice so we can compete for Fortune 500 contracts. We're grateful for the opportunity and know a significant part of our growth will come from being a certified woman owned business."

About Techway Services

Comprehensive Solutions for IT asset disposal

Techway Services, Inc. is a leader in the growing onsite electronic data destruction market, and a nationally recognized provider of end-of-life (EOL) IT services for corporations, government entities, universities, and channel partners. Techway Services provides a full range of EOL services that include reverse logistics, computer remarketing, computer recycling, and electronic data destruction solutions.

Techway Services is also the developer of EBAN mass data destruction software.
