

Successful Pilot Leads to District-Wide Implementation of Caselite Software in Muskegon County's North Service Unit

MUSKEGON, Mich. and CHARLOTTE, N.C. – Aug. 14 (SEND2PRESS NEWSWIRE) – Caselite Software specializes in online therapy scheduling for school-based speech-language pathologists and analytical reporting for district administrators working in the schools; Muskegon County's North Service Unit is located on the shores of Lake Michigan and offers state-of-the-art technology combined with a comprehensive and challenging curriculum.

Muskegon County's North Service Unit is the first district-wide implementation of Caselite in the State of Michigan. "Following a pilot of Caselite Software, we are expanding its use to the remainder of our SLP staff. Those involved in the pilot enthusiastically recommended it to their colleagues," Jan Borowicz, Supervisor of Special Education, said.

"For me, this is what it's all about," said Caselite Software President and Founder, Marc T. Calello. "There is no better validation of the Caselite story, the 'proof is in the pudding,' as they say. When SLPs are excited to introduce Caselite to their entire district after experiencing the benefits for themselves, it becomes very clear that Caselite is making an impact on the daily lives of school-based SLPs," added Calello. Borowicz went on to say, "It has helped tremendously in reducing the dilemmas that scheduling creates in the life of our therapists."

New features appearing in the most recent release of Caselite, v3.2, which will be in use at Muskegon County's North Service Unit, give speech-language pathologists more control over custom grouping and promoting students for a new school year, along with many other enhancements.

Caselite Software was born out of necessity. Headquartered in Charlotte, NC, the company was founded by a speech-language pathologist, Monica Calello, M.S. CCC-SLP, and her husband Marc T. Calello, a software engineer, to solve her scheduling needs while working in the local schools. The endless hours of scheduling, re-scheduling and creating handwritten teacher views of schedules prompted the Calellos to fill a much-needed niche in the market.

Caselite is web-based and offers video demonstrations of Auto Scheduling and District Administrator features as well as a free online tour.
