

Team TSI Expands GPS Fleet Installation Market to Major Metropolitan Cities

ORLANDO, Fla. – Aug. 14 (SEND2PRESS NEWSWIRE) – Team TSI, the national leader in GPS fleet tracking, laptop, navigation and fuel management system installations, announces national coverage expansion to include: Phoenix, Las Vegas, Los Angeles, and Topeka, Kan.

Send2Press Newswire

These new territories continue to enhance Team TSI's national-coverage footprint and reputation as national fleet installation specialists and field-support experts.

"We are excited to announce that we are well on our way to having 100 percent coverage within the continental U.S.," Craig Finlay, CEO and founder of Team TSI, said. "It has put us on the map."

Existing and new partnerships continue to be the key to Team TSI's success.

"Team TSI has proven to be beneficial to the growth and enhancement of our customer base that has realized approximately 100 percent year-on-year growth," Morgan Bemko of Fleetmatics USA, a national GPS fleet tracking provider, said. "Our ongoing partnership with Team TSI will be the key to our continued future success as we also grow throughout the U.S."

Bemko has found that focusing on what they do best and allowing Team TSI to provide installation and superior customer service has been beneficial to their customers and also boosted Fleetmatics' profits.

Providing world-class customer service and high-tech support since 1998, Team TSI is a national installation contractor that focuses on the customers' needs. The company has completed over 100,000 installations for more than 30 manufacturers. Based in Orlando, they are currently the national installation contractor for 21 major metropolitan locations throughout the U.S.

Team TSI's main focus is delivering world-class customer service.

"We maintain open and informative lines of communication with our customers while completing the best mobile electronic installations in the business," Finlay said.

Team TSI attributes its steady rise to the top of the industry to its great employees, leverage of computers, wireless access and use of the Internet.

Communication with customers, vendors and technicians is clear. They communicate about schedules and order confirmations; and efficiently dispatch and complete customer orders.

Customers are also given the opportunity to provide feedback through surveys that are included with each and every order.
