*Tigerwood Decking Gives Homeowners an Exotic Hardwood Deck that will Last 25 Years or Longer with Low Maintenance*

BUFFALO, N.Y. (SEND2PRESS NEWSWIRE) – Advantage Trim & Lumber today announced the release of Tigerwood Decking to finally give homeowners a low maintenance and long life deck material at a cheaper price than other hardwoods like Ipe.

**Send2Press® Newswire**

“In talking with homeowners, one thing that became very clear was that they were in need of a low maintenance hardwood decking product similar to Ipe that would offer them the same benefits but at a lower cost,” said Dan Ivancic the company’s Director of Marketing. “That’s exactly what Tigerwood Decking offers.”

Many homeowners have come to enjoy not only the cost and stability of this material but they really enjoy its rich exotic look. The descriptive name Tigerwood Decking comes from the woods resemblance of a tiger. The wood has a

beautiful light golden brown to reddish brown color with irregular black and brown streaks.

“The initial response to Tigerwood Decking has been even better than we expected,” continued Ivancic. “I think what we’re seeing is that our customers are also drawn to many of the natural benefits that Tigerwood offers that many other materials like composite decking can not.”

For example, Ivancic said that Tigerwood Decking features many excellent properties – it’s naturally mold resistant, resistant to rot and decay, resistant to insect attack, Class A flame retardant, does not splinter or crack which makes it great to walk on bare foot, and it has a 25+ year life span all without any kind of chemical treatment applied to the wood.

Advantage Trim and Lumber provides Tigerwood decking in many different widths and lengths. This product is also available in hardwood flooring so homeowners can have the same beauty and durability for both indoor and outdoor applications.

#### **About Advantage Trim & Lumber Co.**

Tigerwood Decking is just the latest decking material from Advantage Trim & Lumber. The company has also produced Ipe Decking, Ipe Porch Flooring, as well as over 50 species of hardwood flooring. The company also carries domestic lumber, exotic lumber and specializes in custom milling trim and molding.
