

Atreus Systems Delivers Next Generation Enterprise VoIP Activation Solution for Service Providers

Release 3.0 Provides Portal Improvements, Increases BroadSoft Feature Coverage and Simplifies Back-Office Integration

PHOENIX, Ariz. – Oct. 15 (SEND2PRESS NEWSWIRE) – BROADSOFT CONNECTIONS – Atreus Systems(TM), the leading supplier of provisioning solutions for converged IP services, today announced the general availability of release 3.0 of their Enterprise VoIP provisioning solution. The new release is designed to help carriers achieve greater operational efficiencies with Hosted PBX, IP Centrex and Business Trunking applications.

Send2Press® Newswire

Designed to operate on the xAuthority(TM) multi-service provisioning platform, Atreus' VoIP provisioning solution empowers operators to launch differentiated service offerings with a compelling customer self-serve experience.

Key enhancements of the latest release include:

- * Comprehensive feature support for the BroadWorks (Release 14) platform;
- * Improved a-la-carte feature packaging with additional control for license

tracking and consumption;

- * Enhanced group feature support for trunk groups, hunt groups, instant call groups and call centers;
- * Multiple numbering plan support with enhanced search capability;
- * Standardized web services interfaces, fully certified according to TMF OSS/J specifications;
- * Foundation for converged service offerings, including FMC and IMS; and
- * Additional customization interfaces for key process steps, including emergency services registration, billing account validation and voicemail set-up.

Complementing the new Enterprise VoIP provisioning solution is an extensive library of additional service-specific modules that encompass industry best practices for provisioning. Atreus' out-of-the-box service solutions help providers speed time-to-market for new services by streamlining the many steps required to successfully turn-up and manage IP services. Atreus also provides pre-integrated vendor-specific adaptors for VoIP and IMS application servers, and easy-to-use portals for CSRs and resellers, as well as customer administrators and end users.

"Atreus' new Enterprise VoIP release helps service providers deal with subscriber growth as well as competitive pressures to offer a compelling range of service bundles to business customers," said Ken Workun, Director of Product Management, Atreus Systems. "Atreus' enhanced self-service portals and a-la-carte capabilities gives providers the flexibility to offer tailored feature packages, which helps them address the key challenges of reducing customer churn and generating incremental revenue streams."

Visit Atreus at BroadSoft Connections from October 14-17, 2007. Doug Bellinger, CTO, Atreus Systems has been enlisted by BroadSoft to address, "Scaling Operations to Support Millions" on Tuesday, October 16th at 2:45pm. Conference attendees at BroadSoft Connections will hear expert insight in scaling operations to deploy revenue-generating VoIP, mobile, and IMS applications.
