

ZK Software Selects SecuGen Sensor for S900 Access Control and Time and Attendance Terminal

SANTA CLARA, Calif. – Dec. 11 (SEND2PRESS NEWSWIRE) – SecuGen, a world-leading provider of fingerprint recognition technology, is pleased to announce that ZK Software has selected SecuGen's FDU02 fingerprint sensor for integration with its newly released S900 access control and time and attendance terminal.

Send2Press Newswire

ZK's S900 features the fastest commercial based fingerprint matching algorithm together with SecuGen's high performance, high image quality and very rugged fingerprint sensor. The SecuGen sensor is among the most robust sensors available and is resistant to scratching and electrostatic shock.

Jaimin Shah, Managing Director of ZK Software USA said, "SecuGen sensors are known around the world for their superior image quality and exceptional ruggedness. Integrating the SecuGen sensor in the S900 will allow us to sell our device into rough and tough environments where only a rugged and high quality sensor will do. The S900 is the first of many new terminals that we have planned for the North American market."

Won Lee, CEO of SecuGen stated, "ZK Software is a world leader in the access control and time and attendance markets, and we are very proud to be supplying our fingerprint technology to them. Our own success is entirely dependent upon partnerships with top notch companies like ZK Software."

About ZK Software

ZK Software is a world leading manufacturer of access control and time and attendance systems. Over 800,000 ZK Software terminals are used by over 50 million users in over 70 countries around the world. ZK Software has its own in-house manufacturing facility, a 40,000 square foot plant with over 1,000 employees. ZK Software's North American operations are headquartered in New York City.

About SecuGen

SecuGen Corporation (www.secugen.com) is the world's leading provider of advanced, optical fingerprint recognition technology, products, tools and platforms for physical and information security. SecuGen designs and develops FBI-certified fingerprint readers and OEM components, developer kits and software, including NIST/MINEX-compliant algorithms. Known for high quality,

ruggedness and performance in a wide variety of applications and environmental conditions, SecuGen products are used by world-leading financial, medical, government, educational and corporate institutions and are sold through a partner network of over 200 original equipment manufacturers, independent software vendors and system integrators around the world.

SecuGen is a registered trademark of SecuGen Corporation in the United States and other countries.
