

Relios Jewelry Springs into Fashion with Fresh New Seasonal Looks

Jewelry maker combines color to take the guesswork out of what to wear this season

ALBUQUERQUE, N.M., March 13 (SEND2PRESS NEWSWIRE) – From a Backyard Barbecue to Easter Brunch, Relios Jewelry has got you covered when it comes to fresh and fun new spring jewelry! Reliosjewelry.com has added a special page dedicated solely to the very latest in Spring Fashion. The new section spells out what's new and exciting this season with several different ready-made looks that literally take the guess work out of what to wear.

Send2Press Newswire “It’s truly like the ultimate fitting room for spring jewelry,” says Lead Relios Designer Carolyn Pollack. “We (Reliosjewelry.com) feature several different spring wardrobe ensembles with jewelry to match, and also include a special color palette for each look, so that customers can easily mix and match, and put it all together.”

At Relios, color is key – it’s at the heart of all of their designs. Each season, the company unveils new looks to match the latest runway fashions and styles. Among this year’s hot Spring looks you’ll find: Garden Wedding, Romantic Getaway, and National Park Vacation to name a few.

Lead Relios Designer Carolyn Pollack and Relios Director of New Jewelry Development Susan Chiasson combine their trend-savvy talents to always stay one step ahead of the latest fashion trends. Together, they continually peruse national and international trend sources to zero in on the popular color palettes and silhouettes for the upcoming season.

Send2Press Newswire “When people think ‘spring,’ things like bugs, butterflies, and blossoms come to mind,” says Susan Chiasson, Relios Director of New Jewelry Development. “But in our line of work, those thoughts translate into

fresh new color palettes that we can bring to our collections. Right now, we're coming out of the darker cooler days of winter into a time of something warmer, brighter, more playful and light-hearted... so we want our spring jewelry to reflect that seasonal change."
