

SecurWireless, KapLogic Team on Physical Security Solutions

Companies join forces to provide turnkey wireless systems

LANDOVER, Md., March 25 (SEND2PRESS NEWSWIRE) – SecurWireless, Inc. (SWI), provider of fully integrated wireless surveillance products and services for government, state and local, and commercial applications, and KapLogic Corporation, the security industry's leading developer of security integration software, have formed a joint marketing partnership. This constructive relationship enables the two companies to collaborate on sales, marketing, promotions, business development, and project development for target markets that match SWI's wireless surveillance systems with KapLogic's graphical command and control integration software.

Send2Press® Newswire

SecurWireless and KapLogic already have an extensive commercial project underway in Hawaii and will continue to work together to provide other customers a unique solution for rapidly deploying surveillance to meet immediate security concerns.

"The KapLogic-SecurWireless relationship establishes a critical interoperable capability that the Security market needs," said Corby Lawrence, SecurWireless CEO. "SWI's ability to rapidly deploy innovative wireless

systems, combined with Aegis' compatibility with a myriad of other installed components at the head-end gives our customers a tremendous solution. KapLogic continues to provide powerful technologies to answer the serious interoperability problems facing security organizations, and we are excited to be working closely with them."

The demands of security professionals for an easy to use security head-end with significant integration capabilities which provides for scalability with unlimited ability to migrate to new technologies and the "behind the scene event automation" continues to be met by the Aegis software. "Adding SecurWireless to the more than 25 manufacturing partners of KapLogic is a milestone. The partnership with SecurWireless strongly positions KapLogic in the wireless marketplace," said Dick Beard, KapLogic President. This partnership will drive our mutual growth and innovation as well as empower our customers to choose the combination of technologies that best serves their purpose."

KapLogic is the latest addition to SecurWireless' select group of partners that work together to deliver best of breed technology solutions to an industry in critical need of cutting edge, secure, integrated systems that reliably deal with today's threats.

About SecurWireless (www.SecurWireless.com)

SecurWireless, Inc., headquartered in Landover, MD, is a high technology product and services company that provides affordable, rapidly deployable and easily maintained wireless infrastructure systems specifically for video and other surveillance applications. The company's roots stem from meeting Military requirements for highly reliable, rapidly deployable, rugged mobile wireless perimeter surveillance to support the Global War on Terrorism. SecurWireless continues to meet these demands and has leveraged its experience to provide other government and public safety agencies with the same capabilities. Having to install thousands of yards of cable or fiber infrastructure for video is costly and time consuming. Threats are here today and professionals need surveillance now, not after months or years of planning and spending millions of dollars. SecurWireless' technologies meet this need and more importantly the systems are open and interoperable for expandability to meet the threats of tomorrow.

About KapLogic (www.KapLogic.com)

KapLogic Corporation, headquartered in Denver, Colorado, is a manufacturer of security integration products. KapLogic's marquee product, Aegis, has a worldwide installation base many vertical markets: Airports, Banking, Education, Commercial-Industrial, Government, Healthcare, Military, Oil & Gas, Ports, Retail, Transportation, and Utilities.
