

# Arrowmid Joins SecurWireless VAR Program

**Arrowmid is first to bring SecurWireless innovation to Israel**

LANDOVER, Md., April 11 (SEND2PRESS NEWSWIRE) – SecurWireless, Inc., provider of seamless wireless surveillance solutions for government, state and local, and commercial applications, has named Arrowmid Group Ltd., an Israel communications, security and defense firm, to its SecurVAR program. As the program's first international Value Added Reseller, Arrowmid is the first to market SecurWireless' best of breed wireless surveillance products outside of the United States.

"Arrowmid, along with its integrator partners, is addressing key problems in the agriculture, infrastructure, oil and gas industries and personal security," said Corby Lawrence, SecurWireless President and CEO. "Our technology enables security personnel to get critical data, while they're on the move, where there are gaps in coverage, where infrastructure does not exist, or requires expansion. Arrowmid's intimate understanding of their clients needs, along with their ability to enhance our solution, gives their clients additional data points and mobility that brings yet another level of effectiveness and efficiency to a security operation."

“Arrowmid field expertise and SecurWireless products and solutions together are a natural fit for security in multiple markets,” said David Frischman, head of International Business Development at Arrowmid. “Arrowmid has considerable experience in technical operations, communications and security. We look forward to working with SecurWireless to replicate and extend this success in Israel and offshore. Our companies are compatible and complementary, customers of either company will receive tremendous value by integrating both company’s solutions into their current security infrastructure, as well as future plans.”

**About Arrowmid Group ([www.Arrowmid.com](http://www.Arrowmid.com))**

Arrowmid Group is a well-established leader in the Communication and Security Industry in Israel. Arrowmid has a fully equipped Service Center for Technical Support, R&D and Repairs. Arrowmid’s customer base consists of Government, Military and Civilian entities. In addition, Arrowmid Group works with many their partners to provide them equipment and solutions for offshore clients.

**About SecurWireless ([www.SecurWireless.com](http://www.SecurWireless.com))**

SecurWireless, Inc., a Veteran-owned, service disabled company, headquartered in Landover, MD, is a high technology product and services company that provides affordable, rapidly deployable and easily maintained wireless infrastructure systems specifically for video and other surveillance applications. The company’s roots stem from meeting Military requirements for highly reliable, rapidly deployable, rugged mobile wireless perimeter surveillance to support the Global War on Terrorism.

SecurWireless continues to meet these demands and has leveraged its experience to provide other government and public safety agencies with the same capabilities. Having to install thousands of yards of cable or fiber infrastructure for video is costly and time consuming. Threats are here today and professionals need surveillance now, not after months or years of planning and spending millions of dollars. SecurWireless’ technologies meet this need and more importantly the systems are open and interoperable for expandability to meet the threats of tomorrow.
