

# exxHelp Help Doc Builder Software Released

LUDWIGSBURG, Germany, Aug. 27 (SEND2PRESS NEWSWIRE) – Pintexx, a software company based in Ludwigsburg Germany is happy to announce the release of their new web based help authoring system, exxHelp. A sister company to Libera, Inc. (Jamestown, NY), Pintexx's exxHelp is a web-based help authoring system which lets you create Help Documents online.

It is very easy to use, and by using AJAX technologies, fast. Editing of pages is done online with the powerful WYSIWYG online editor pinEdit. There is no upload and creation process of output files. After saving changes the new content is immediately available.

Full-text search with highlighting search words is available. Table of contents is synchronized after activating links. Standard Windows help files (CHM) can be imported with the exxHelp Import function.

A powerful integrated HTML optimizer lets you use content of external sources like MS Word. A spell checker and a style editor for extensive style usage is integrated.

For more information please visit the company websites at [www.pintexx.com](http://www.pintexx.com) and [www.libera.com](http://www.libera.com).
