Why do we sleep with rectangle-shaped bed pillows anyway? This is not the most comfortable shape for our bodies! And what do we do with all of those bed pillows that we wrestle and try to get comfortable with?

The answer is to transform them into better, more useful shapes that support us in all of the positions that we need for comfort in bed.

Curvy Transformational Pillow Covers are made of 100% cotton (organic cotton also available) and will transform your ordinary pillows into 3 new functional supports: 1) A Curvy Backrest that supports your head, back, and arms, for reclining, reading and watching television in bed. 2) A Curvy Head Pillow that is oval and can easily adjust, spin and flip without falling out of its case. 3) A Curvy Body Pillow that is the most like a human body and offers support exactly where you need it.

3-Piece Set of Curvy Pillow Covers costs \$99.95 plus 5.00 shipping and is available on Amazon.com.

Each Curvy Pillow Case comes with a zippered closure that keeps your bed pillow securely in place. Curvy Covers are an economical way to create comfort in your own bed or on the road. They are compact and easy for travel.

Using ordinary hotel pillows, you can have your backrest, head and body pillow with you wherever you sleep. Curvy Covers easily pack in a small section of your suitcase or purse. They make a great gift for any-body!
