

# EASEUS Makes Partition and Disk Copy Easy and Free with New Disk Copy Freeware

CHENGDU, China, Nov. 5 (SEND2PRESS NEWSWIRE) – When upgrading a hard drive, it is inevitable that computer users will come face-to-face with the challenge of reinstalling an operating system and all its applications. The process, while necessary, is very time consuming. EASEUS has made the process short and sweet with the release of its new Disk Copy V2.3.

Send2Press® Newswire

Disk Copy V2.3 is the best freeware for hard disk copy. It is a unique tool that copies the hard disk sector-by-sector, despite the type of operating system, file system or file type. It runs totally under DOS, creating a 100 percent identical hard disk.

After the job is done, the computer user simply plugs in their new hard disk to their computer and it runs just the same as before. Nothing is changed with the exception of a bigger and better hard disk.

And, the most exciting part is that it's totally free for personal use – freeware. There are no limitations and no hidden fees.

Disk Copy V2.3 performs a variety of functions that include: disk and partition copy; and complete hard disk or partition transfer to a whole new location.

The sector-to-sector method provides users with a copy that is 100 percent identical to its original. Disk Copy V2.3 can be used for backup, disk cloning, or upgrading an original small hard drive to a new larger drive.

It's as easy as 1-2-3. This freeware can backup anything from old hard drives including deleted, lost files, and inaccessible data.

In addition, it is perfectly compatible with all popular hard disk interfaces such as: SATAI, SATAII, SCSI, FireWire (IEEE 1394) and USB. It supports hard disks up to 1 TB.
