

Partition Server Magic Tool: EASEUS Partition Manager Server Edition V2.1

NEW YORK, N.Y., Nov. 20 (SEND2PRESS NEWSWIRE) – EASEUS Software, a leading software provider, announces the release of their latest server edition of Partition Manager Server V2.1, a product that provides easy and reliable hard drive partitioning and hard disk management. Partition Magic and Server Magic are out-of-date because PQ was acquired by Symantec and stopped updates.

That's why EASEUS' Partition Manager Server Edition works perfectly as an alternative to Partition Magic and Server Magic. And, with new and improved wizards to lead the way, it's just like magic! Partition Manager Server Edition enables the user to create copy, resize and move hard drive partitions, and perform other hard drive maintenance tasks without difficulty.

EASEUS Partition Manager Server Edition works in server and non-server Windows systems – 2000 Server/Advanced Server; 2003 Server (32- and 64-bit) and Windows 2000 Professional SP4; and Windows XP (32- and 64-bit).

It also dispels negative myths about hard drive maintenance. Many computer users are intimidated by the idea of managing their own disk drive. They have the impression that it's difficult, time consuming, or even dangerous! Well,

it's a myth and EASUS Partition Manager Server is a tool that allows computer users to easily create, format and delete partitions in their hard drive at anytime. The program features a very intuitive, user-friendly interface which makes all these tasks as simple as child's play.

EASEUS Partition Manager works with different file types and can handle hard drives of up to 1TB. However, its most outstanding feature is its ability to allow users to move and resize partitions, live, without erasing them or losing data; administrative rights are required to use it.

Discounts are available when multiple licenses are purchased. Licensed customers receive lifetime technical support.
